

New Features & Enhancements for FCS

a Jobba Trade Technologies product

FCS is a fully integrated, cloud-based software system that reaches every aspect of a commercial roofing business. This document outlines the new features and latest enhancements made to FCS.

Administration

Dispatch Settings: Invoice ID prefix & suffix now accessible in administrator settings.

Reporting

Month-End Service Report: Filter to include only days of the month selected.
Production Detail Report: Does not include archived data.

Sales Module

Mobile Plotting: Added logic to check for permissions.
CRM Search: Able to search by group while input in search bar is empty.

Service Module

Service Summary of Labor Hours: Summation for labor and travel on a dispatch ticket now visible in both billable and actual section.

Production Module

Cloud Storage: Date, time and user stamp added to all documents uploaded into the cloud storage.

Administration

Dispatch Settings: Invoice ID prefix & suffix now accessible in administrator settings.

Reporting

Month-End Service Report: Filter to include only days of the month selected (i.e. 2/1/2021 - 2/28/2021 would NOT include anything created on 3/1/2021) as expected.

Production Detail Report: Does not include archived data if you do not include it.

Sales Module

Mobile Plotting: Added logic to check for permissions before allowing a user to replot a section using mobile.

CRM Search: Able to search by group while input in search bar is empty.

Calendar Time Zone: Email invite on calendar and FCS mobile notifications on schedule correctly adjusting for time zones.

Inspection/Invoice Report: State input now visible in Admin Settings that will default to be blank instead of "XX".

Coatings Budget Total: Logic added when calculating replacement value from sq. ft. that recommendation type cannot be "coating". Added coating calculation from sq. ft. when recommendation type is "coating".

Service Module

Service Summary of Labor Hours: Summation for labor and travel on a dispatch ticket now visible in both billable and actual section.

Service Report: "Date on Invoice" and "Date Invoiced" labels switched to show more semantic representation of data.

Adding Images via Desktop: Desktop is limited to uploading a max of 4 images per deficiency or fix (same as mobile) so the images fit properly in the PDF generated.

Service Repair: Ability added to record video during a repair/service ticket.

Warranty Info on Mobile: No longer defaulting to year 1969.

Production Module

Cloud Storage: Date, time and user stamp added to all documents uploaded into the cloud storage.
